

Search

The search page allows users to view all currently active TIDs, Sites, Chains and Acquirers and acts as a gateway to configuration of said assets. Each of the four asset types have their own search tab with functionality tailored accordingly.

Common Functionality

The following functionality is common to all four search tabs.

Searching & Filtering

Upon initial loading each tab of the search page will be empty. With the search box left empty, pressing the `Search` button will retrieve all results for the current tab from the database. Entering a complete or partial search term in before pressing `Search` allows the user to filter the data presented for more precise usage.

Search results can be ordered by any of the column headers in either ascending or descending order.

Pagination

Due to the large volume of data involved search results are limited by default to ten results per page. This can be altered using the *Show entries* dropdown box and users can navigate between pages of results using the navigation buttons to the bottom right of the search results.

Export

Each search tab has the option to export the current search results as a `.csv` file.

TIDs

A Typical TID search result looks as follows:

≡

Network

TIDs

Sites

Chains

Acquirers

Show

15

entries

Search:

Fields

| Field Name | Usage |
|---------------|--|
| TID | This value represents the <i>Terminal ID</i> and is the primary, user assigned identifier for a PED. This value must be unique across the entire estate. |
| Serial | This value represents the serial number of a PED device and can be found on the device itself. This value must be unique across the entire estate. |
| Enrolment PIN | This value is the PIN entered during the enrolment of the device. This value is generated by pressing the <code>Generate Enrolment PIN</code> button. |
| Reset PIN | This value is the PIN entered when performing a factory reset of a device. This value is generated by pressing the <code>Generate Reset PIN</code> button. |
| Activation | Denotes the time and date on which the device was enrolled. |
| Merchant ID | A unique numerical identifier which denotes which Site the device is associated with. |
| Site Name | The name of the Site the device is associated with. |

Buttons

Generate Enrolment PIN

Generates a new enrolment PIN to enable a new (or factory reset) device to be enrolled. Value generated is random and expires after a pre-determined length of time.

Generate Reset PIN

Generates a new reset PIN to enable the factory reset of a device. Value generated is random and expires after a pre-determined length of time.

Delete

Deletes the current device from the database. Requires Change Approval to confirm deletion.

Manage Updates

Used to determine the APK version the device should run. User is able to set not only the target APK version but also the date and time that the update should be actioned from.

TID Updates

Minimum Software: 209

| Target Software | 3rd Party Target | Update Date | |
|-----------------|--------------------------------------|-----------------------------|-------------------|
| <div>305</div> | <div>Third party mode disabled</div> | <div>2022-03-28 12:19</div> | <div>Delete</div> |

Add

Apply

Details

Provides the user with an overview of key device information.

| TID Details | |
|--------------------------------|-------------------------------|
| Software Version | 116008 |
| Firmware Version | V2.0.0.20211115 |
| Last Recorded Transaction Time | 2022-03-26 05:11:22 |
| PED Last Checked | 2022-03-28 11:26:09 +0100 BST |
| PED Confirmed | 2022-03-26 05:03:27 +0000 GMT |
| Last APK Download Time | 2022-03-25 17:08:46 |
